

## LUCRĂRI ȘTIINȚIFICE

Bozantan, A. (2010). An implementation of the piecewise-linear homotopy algorithm for the computation of fixed points. *Creative Mathematics and Informatics*, 19(2):140–148.

Bozantan, A. and Berinde, V. (2013). Applications of the PL homotopy algorithm for the computation of fixed points to unconstrained optimization problems. *Creative Mathematics and Informatics*, 22(1):41–46.

Bozantan, A. and Berinde, V. (2014). About the implementation and applications of the FIXPOINT software minipackage. *Creative Mathematics and Informatics*, 23(1):41–50.

Bozantan, A. (2014). Comparative study of fixed point software (poster). In *5th Minisymposium on Fixed Point Theory and Applications*. The Tenth International Conference on Applied Mathematics (ICAM 10).

Bozantan, A. and Berinde, V. (2015). A numerical study on the robustness and efficiency of the PL homotopy algorithm for solving unconstrained optimization problems. *Creative Mathematics and Informatics*, 24(2):113–123.

Bozantan, A. and Berinde, V. (2019). A comparative study of the PL homotopy and BFGS methods for nonsmooth optimization problems. *Creative Mathematics and Informatics* (28) (accepted).
